

IN THE SPECIFICATION

Please amend the Specification as follows:

Page 2, lines 7-11, rewrite the following paragraph:

The invention is a hose reel assembly having a unitary support member, which may also be referred to as an upright support member, associated with a hose reel spool having a riser connected therethrough to provide a fluid path, which upright support member includes an axle, bearing and hub assembly, the arrangement being such that an integrated frame, bearing assembly, gearbox and drive unit housing is provided.

Page 4, lines 8-13 (incorrectly referenced as “Page 2, lines 8-13” in the *Amendment*, filed March 23, 2009), rewrite the following paragraph:

In one embodiment of the invention a hose reel assembly 10 as shown in FIG. 2 is provided in which the reel spool 20 is supported on a mounting frame 30 or support associated with a single automotive style stub axle, bearing and five stud hub assembly. Two studs 62 are visible in the view presented by FIG. 2. By this means simplicity of servicing is provided and assembly and disassembly of the reel is accomplished in a similar manner to changing a vehicle wheel.
